

The ancient Mayans used a 260-day calendar called the **Tzolkin**. Every day of this calendar is categorized under one of the 20 sun signs; each sign has its own energy and an archetype represented by its name. Once you connect to your own sign and energies, you'll be able to live in the present moment and experience synchrony and magic in your life.

**TO FIND YOUR MAYAN SUN SIGN:**

1. Locate your year of birth on the board, and write down the corresponding number listed in **Column A**.
2. Add the number that appears in **Column B** alongside your birthday month.
3. Take that result, and add the number of the day you were born.
4. The sum of these 3 numbers is your sun sign number. If the answer is more than 260, then simply subtract 260 from the total to get your number.
5. Now you just need to find your number on the board.
